

You're magnetised !

This comedy is amazing ! The actors are very talented ! Jack Black and Mos Def are Jerry and Mike, two friends who lived in Passac. One day Mr Fletcher says that he leaves Passac for few days and asks Mike, his employee to keep the video club for this time. One morning, two people say at Mike that the tapes are empty. Jerry comes to see that and they discover that Jerry erased all the tapes because he is magnetised... To save the video club, they decide to do remakes of the movies. The plot is top-notch, it's one of the reasons why the film is very good. It's not a blockbuster but the movie is very cool ! The plot and the actors deserved the critic !

At one moment, we can see a lot of people who are waiting to rent Jerry and Mike's sweded movies. It's a big success ! Jerry arrived and all the people ask him an autograph. I love this scene because I was pretty surprised. We can't imagine that their movies become famous !

I strongly recommend watching it, it's a very good comedy for all the family, this movie isn't dull at one moment. It's very funny to see the sweded version of the original movie. This movie isn't flawless but it's the ideal movie to see with friends on a cold evening.

I even go back to the theater to see it twice with no hesitation. Run to the theater to see it ! Your day can't be worrying after this movie !
